

Addon per Confluence interessanti – Test addon #2

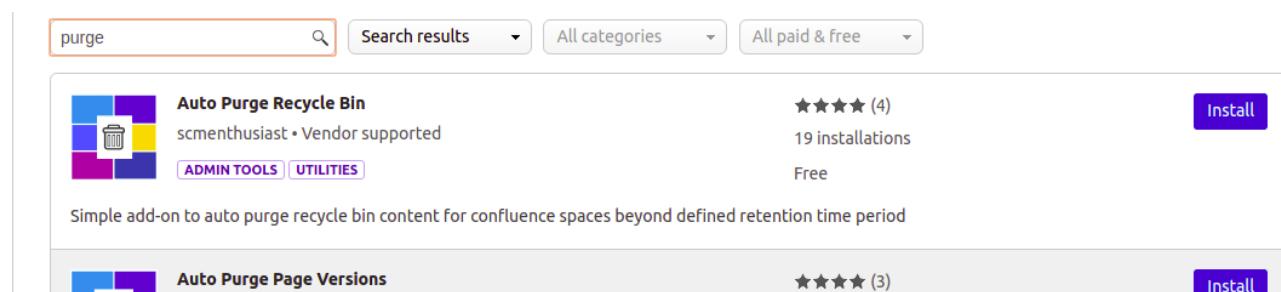

Da esaminare

In questo post andremo ad esaminare degli addon della [scmenthusiast](#), un produttore di Addon che si sta inserendo sul mercato e che abbiamo già avuto modo di esaminare.

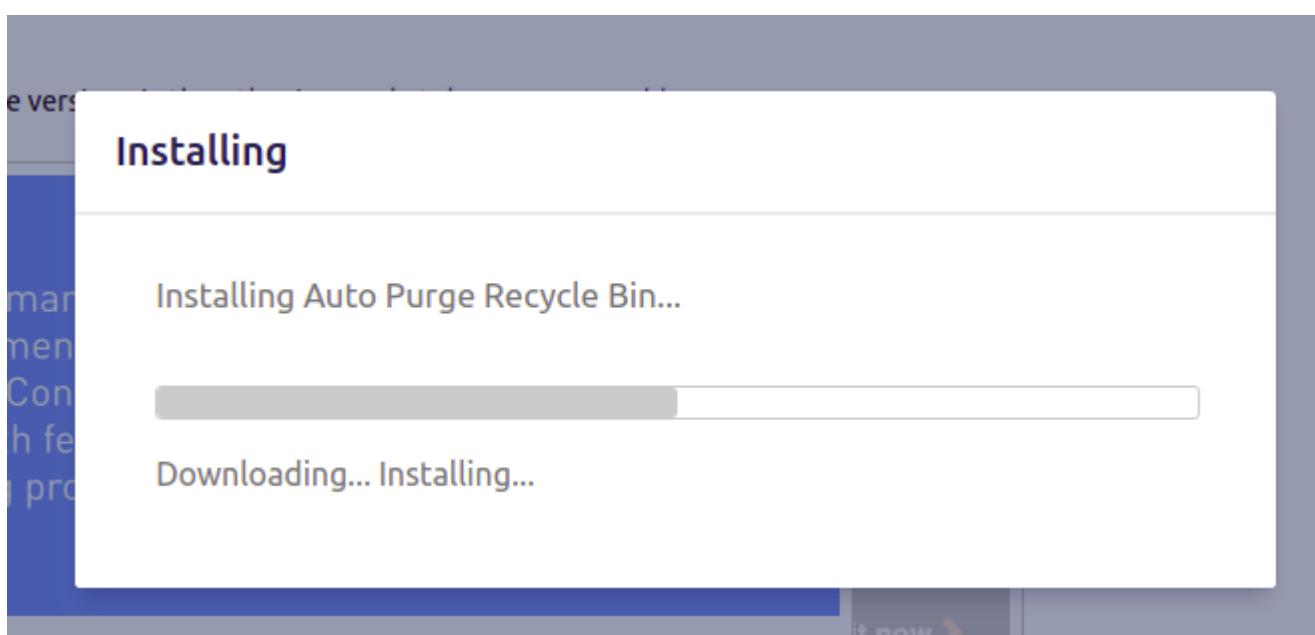

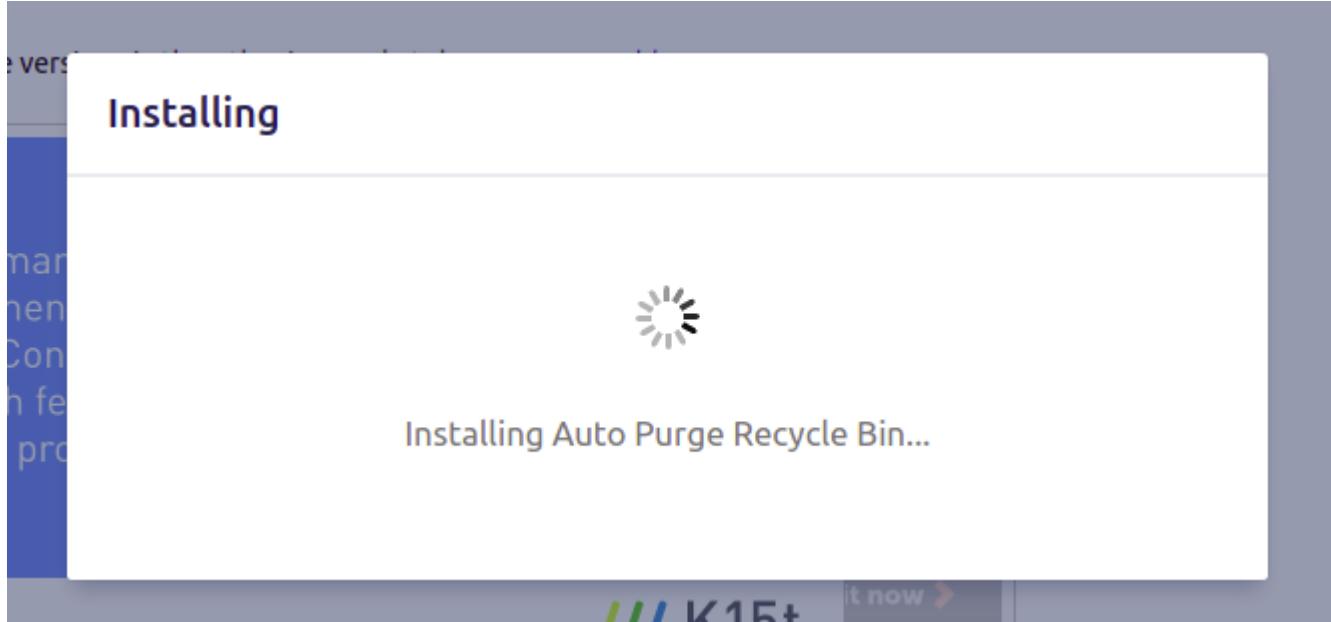

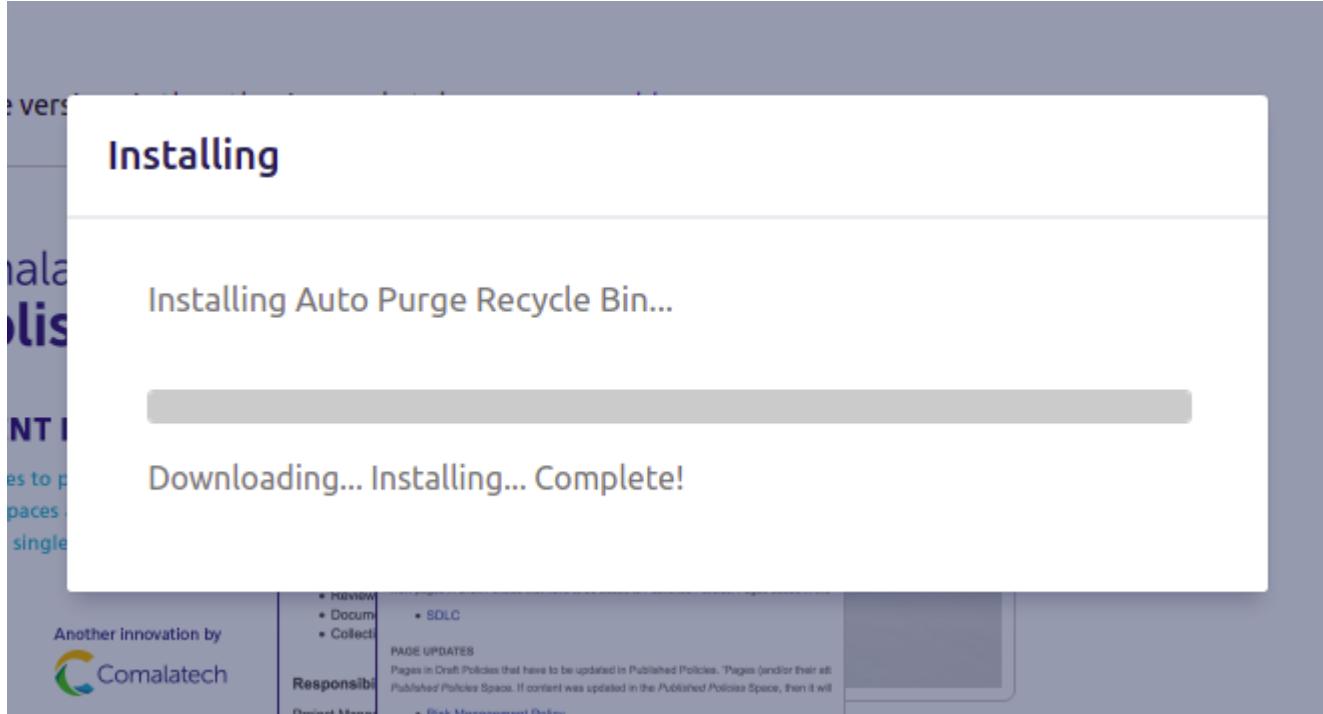

Installazione

Partiamo dalla installazione del primo addon. Come sempre partiamo con l'andare a cercare il nostro addon nella sezione dedicata

A screenshot of the Atlassian Marketplace search results page. The search bar at the top contains the word "purge". Below the search bar, there are four dropdown menus: "Search results" (set to "All categories"), "All categories" (set to "All paid & free"), and two others that are partially visible. The main content area shows two search results. The first result is for "Auto Purge Recycle Bin" by scmenthusiast. It has a "Vendor supported" badge, a "4 stars (4)" rating, "19 installations", and a "Free" badge. There is a blue "Install" button. A description below the badge states: "Simple add-on to auto purge recycle bin content for confluence spaces beyond defined retention time period". The second result is for "Auto Purge Page Versions", which has a "3 stars (3)" rating and a "Free" badge, but no "Install" button is visible. The overall interface is clean and modern, typical of Atlassian's product offerings.

dato che si tratta di un addon free, abbiamo una procedura di installazione molto più semplice (al momento in cui viene redatto il post l'addon è gratuito).

quindi passiamo al test vero e proprio.

Test

Andiamo ad esaminare le sezioni. Andiamo ad esaminare il Trash can dello space TEST (per rimanere in tema) e da lì andiamo a vedere che cosa si può fare.

The screenshot shows the Confluence Space Tools interface for the 'TEST' space. The 'Content Tools' tab is selected. In the 'Trash' section, there is a list of deleted items. One item, 'prova1', is selected. To the right of the list, there are buttons for 'Operations' (Restore, Purge) and a link to 'Purge All'.

Nella sezione addon non abbiamo una form per richiamare l'esecuzione o altra funzionalità, come il precedente addon analizzato. Dalla sezione degli Scheduled Jobs vediamo che esiste, come il precedente addon, un job preconfigurato:

Il risultato della esecuzione di questo job è il seguente:

Confluence

Space Tools

Space: TEST

Content Tools

Trash

Operations

There are currently no items in the trash.

ovvero la pagina PROVA1 è stata rimossa.

Conclusioni

Abbiamo un addon. Anche questo addon non ha tradito le aspettative. Si è comportato molto bene e di conseguenza ci

aiuta molto nel lavoro di mantenere pulito il nostro Confluence. Lo consiglio come Must Have .

Addon per Confluence interessanti – Test addon #1

Da esaminare

In questo post andremo ad esaminare degli addon della [scmenthusiast](#), un produttore di Addon che si sta inserendo sul mercato e che abbiamo già avuto modo di esaminare.

Installazione

Partiamo dalla installazione del primo addon: Purge page version. Andiamo a cercare questo addon nella apposita sezione, come mostrato in figura

Purge Page Versions for Confluence v. 1.1.1

by scmenthusiast

This add-on has been installed. If you need help getting started, click the link to the add-on documentation from the **Manage add-ons** screen.

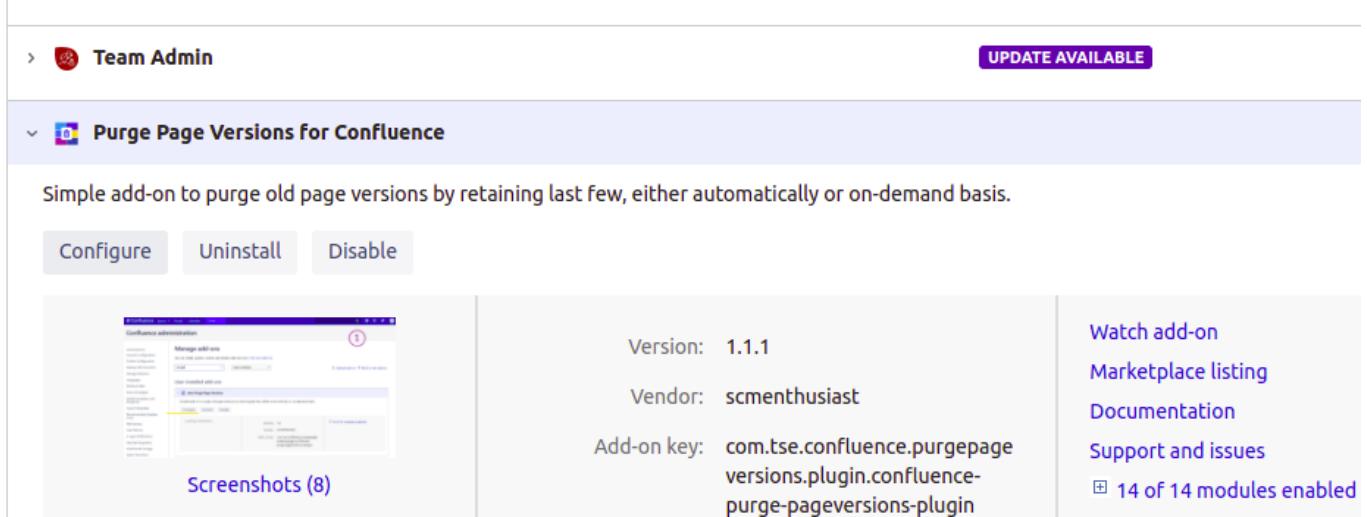

Close

[Support and issues](#)

Abbiamo terminato l'installazione, che come vediamo è molto più semplice. Proseguiamo con la configurazione

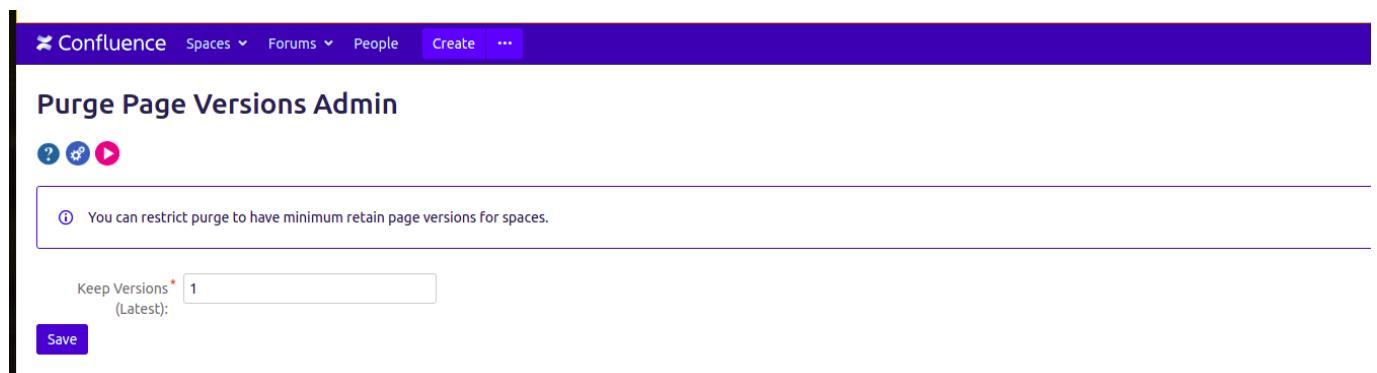

Configurazione

Per accedere alla configurazione andiamo nella sezione di gestione degli addon e nel dettaglio dell'addon abbiamo l'accesso alla configurazione. Nelle prossime versioni sarebbe più interessante che, come altri addon, anche questo potesse avere una propria voce di menù per accedere alla configurazione. Ma sono sicuro che nelle prossime versioni sarà così.

The screenshot shows the Confluence Marketplace page for the 'Purge Page Versions for Confluence' add-on. At the top, there is a 'Team Admin' navigation item and an 'UPDATE AVAILABLE' button. Below this, the add-on title 'Purge Page Versions for Confluence' is displayed with a small icon. A description follows: 'Simple add-on to purge old page versions by retaining last few, either automatically or on-demand basis.' Below the description are three buttons: 'Configure', 'Uninstall', and 'Disable'. To the left, there is a screenshot of the Confluence administration interface showing the add-on management screen. Below the screenshot, there is a link 'Screenshots (8)'. To the right, detailed information is provided: 'Version: 1.1.1', 'Vendor: scmenthusiast', and 'Add-on key: com.tse.confluence.purgepageversions.plugin.confluence-purge-pageversions-plugin'. On the far right, there are links to 'Watch add-on', 'Marketplace listing', 'Documentation', 'Support and issues', and a status indicator '14 of 14 modules enabled'.

La configurazione globale consiste nell'impostare il numero minimo di versioni delle pagine di uno space da mantenere.

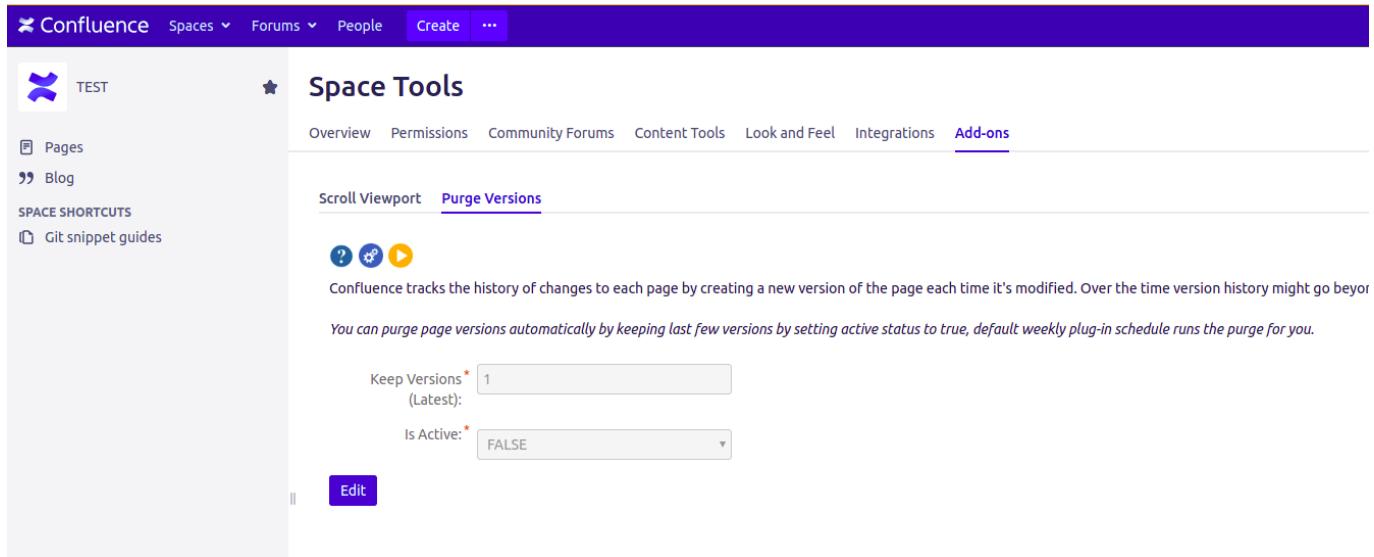

The screenshot shows the 'Purge Page Versions Admin' configuration page. At the top, there is a navigation bar with 'Confluence', 'Spaces', 'Forums', 'People', 'Create', and a '...' button. Below the navigation, the page title is 'Purge Page Versions Admin'. There are three circular icons: a question mark, a gear, and a play button. A message box contains the text: 'You can restrict purge to have minimum retain page versions for spaces.' Below this, there is a form field labeled 'Keep Versions' with a value of '1' and a note '(Latest)'. At the bottom, there is a 'Save' button.

Non abbiamo altre configurazioni da gestire. Passiamo al test dell'addon.

Test

Per il test ci serviamo di uno space che utilizziamo per eseguire dei test, chiamato appunto ... TEST :-D. Andiamo alla sezione di configurazione dello space, nella sezione dedicata agli addon, e vediamo che abbiamo un nuovo TAB: **Purge Versions**.

The screenshot shows the Confluence Space Tools configuration page for the 'TEST' space. The 'Add-ons' tab is selected. The 'Purge Versions' tab is active, indicated by an underline. Below the tabs, there are three icons: a question mark, a gear, and a play button. A note states: 'Confluence tracks the history of changes to each page by creating a new version of the page each time it's modified. Over time version history might go beyond what you need.' It also says: 'You can purge page versions automatically by keeping last few versions by setting active status to true, default weekly plug-in schedule runs the purge for you.' There are two input fields: 'Keep Versions' set to 1 (Latest) and 'Is Active' set to FALSE. A blue 'Edit' button is at the bottom.

Possiamo attivare da questo addon anche una schedulazione automatica per eseguire la pulizia delle Page history, senza dover ogni volta intervenire manualmente...

Conclusioni

Abbiamo un addon molto interessante che finalmente ci permette di centralizzare delle operazioni che altrimenti risulterebbero lunghe e farragginose. Sono sicuro che il prossimo addon che andrò a saggiare non mi deluderà. Rimango in attesa delle modifiche e delle variazioni di questo addon: sono sicuro che saranno introdotte delle piacevoli novità.
