Lively blogs per Confluence & Template for Blog post #1

In questo post andremo ad eseguire un confronto tra due addon, cercando di arrivare a definire quando usarli al meglio, quale è indicato e per quale necessità e, cosa molto importante, come ci possono aiutare

ATLASSIAN

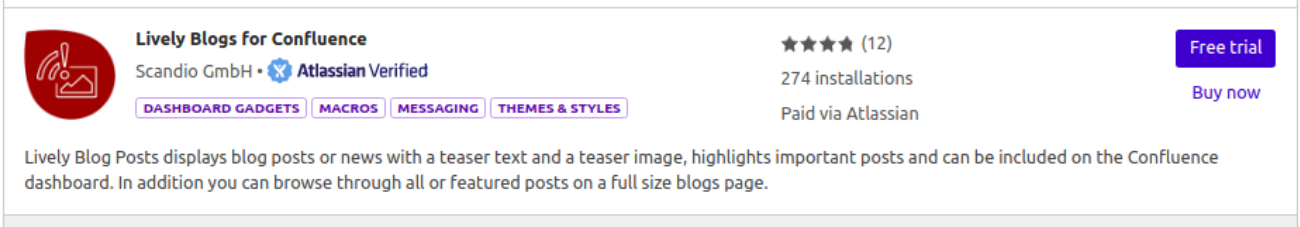
ATLASSIAN

… and the Winner is???

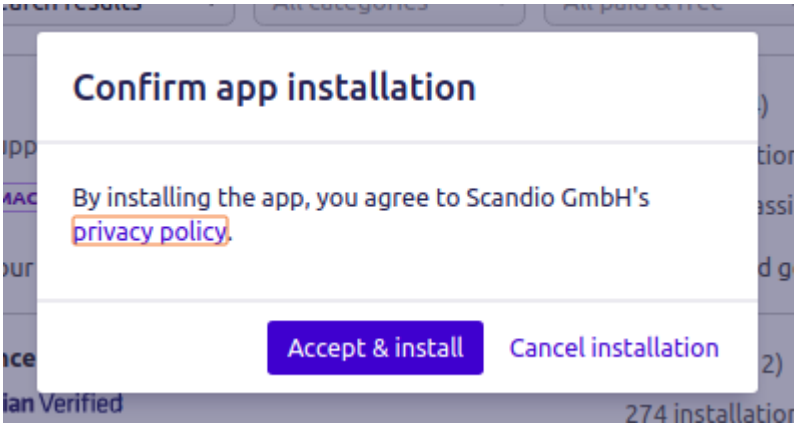
Ovviamente entrambi :D. Non sono qui per dare dei giudizi, ma per aiutare gli utenti a comprendere meglio quale addon risponde meglio alle esigenze ed alle necessità. Per questo motivo dichiaro entrambi gli addon, ***V I N C I T O R I*** di questa competizione

Installazione

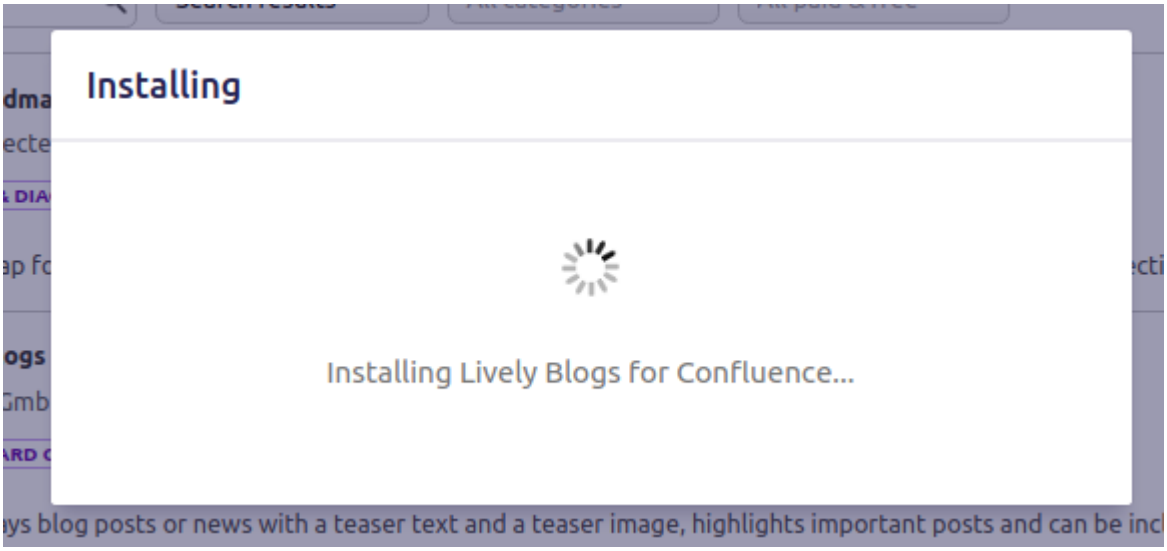
Partiamo dalla fase di installazione di *Lively Blog della Scandio*, cercando il nostro addon dalla lista degli addon disponibili.

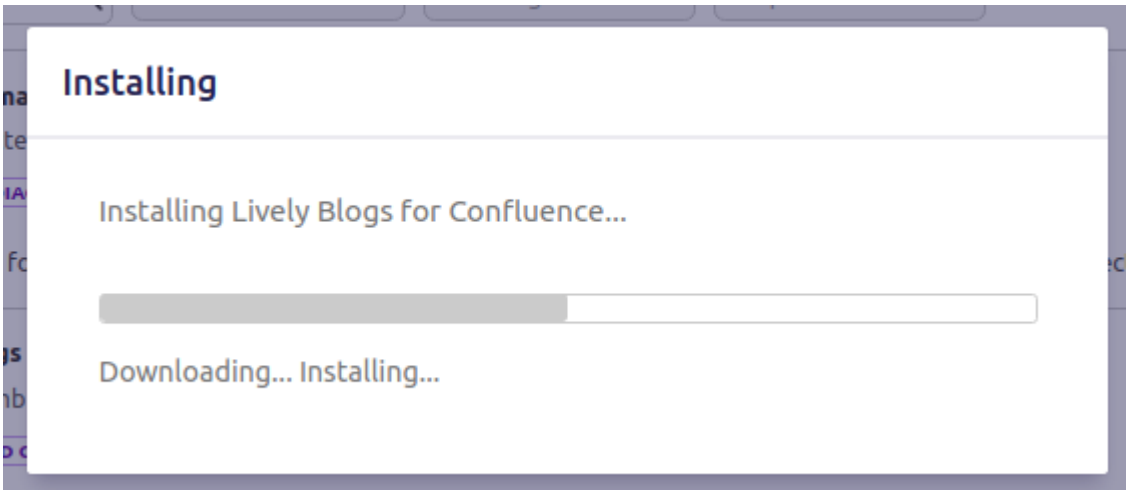


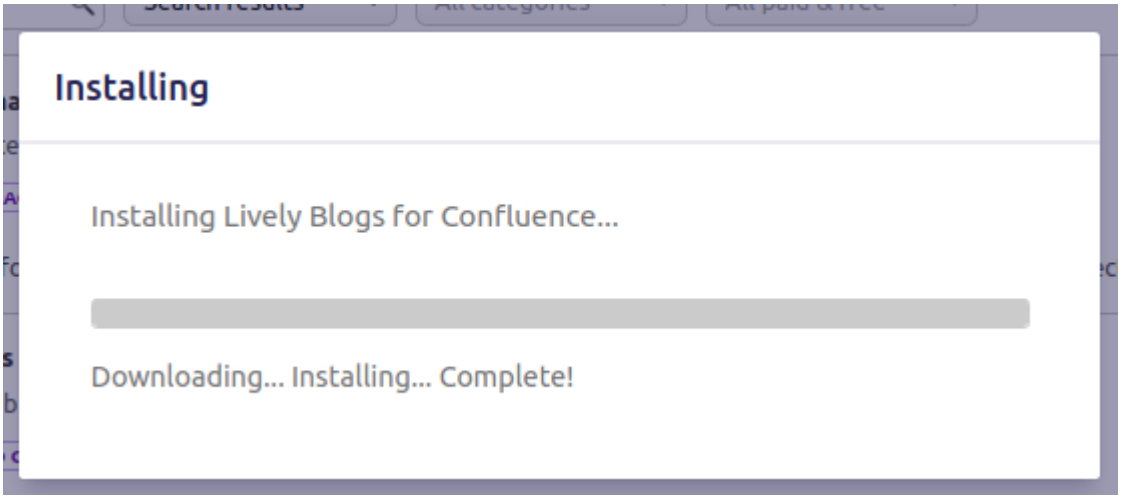
Selezioniamo ***Free trial*** …..

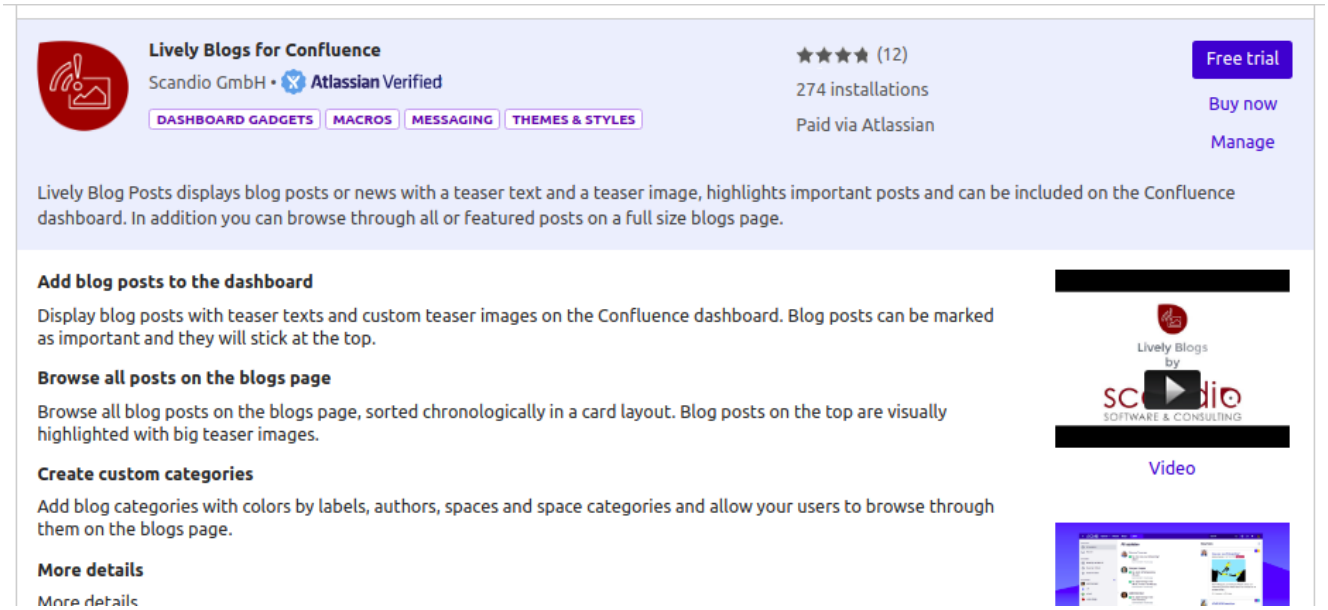


… accettiamo i termini della licenza quindi lasciamo che la procedura di installazione si completi ….

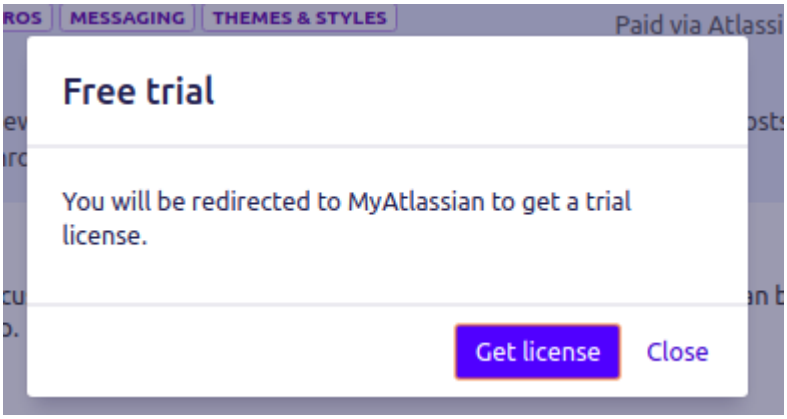




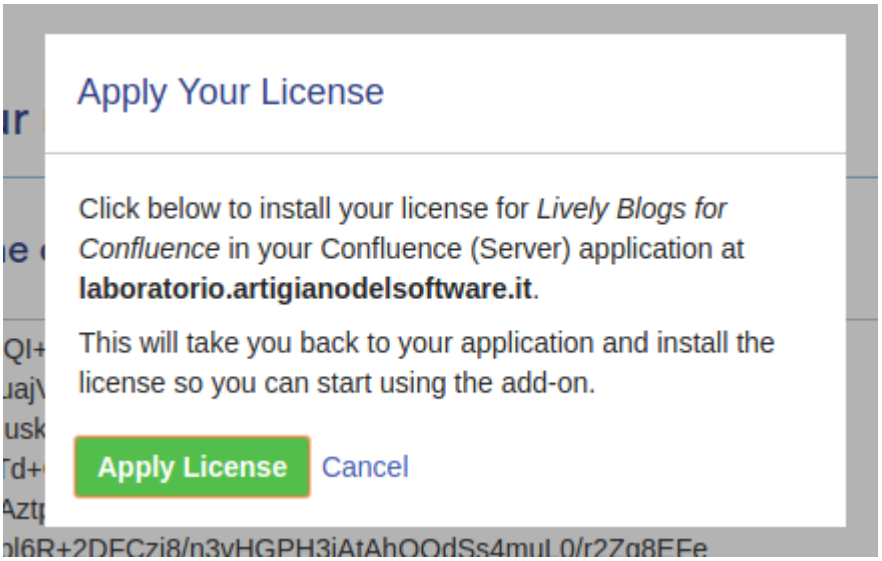




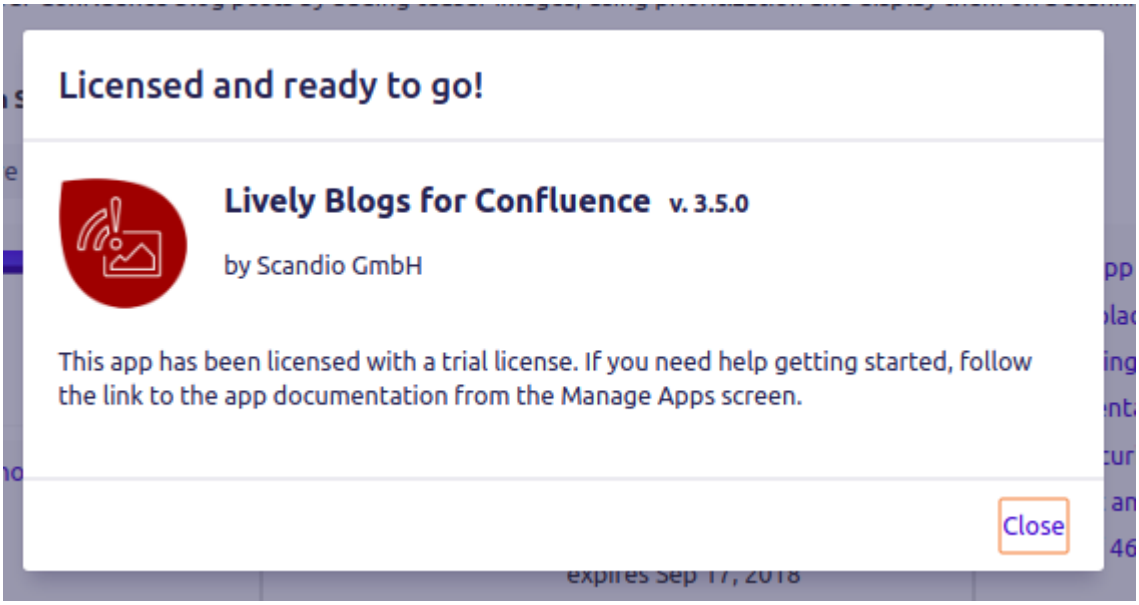
… quindi procediamo con la licenza ….



…. ed una volta generata la licenza trial, procediamo …..



… fino alla installazione



Continuiamo installando Template for *Blog della bitvoodoo*

Procediamo allo stesso modo: selezioniamo ***Free trial***, per attivare la procedura di installazione….

Manage

With the "Templates for Blog Posts" app you can finally use Confluence Templates for blogs! Very suitable for recurring blogs like reviews, team or scrum meetings, and more. Ensure that the design is preserved by creating central blog templates.

Once installed, select "Blog post"

The blog post templates are available through the "Blog post" blueprint and displayed in the "Create Page" dialogue.

Choose a template for your blog post

Select one of the templates you already created from the selection box to publish your new blog post.

Enable the app per space

Enable the app per space or specify special configurations for each space.

More details

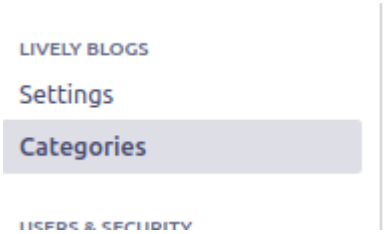
Passiamo adesso alla fase successiva.

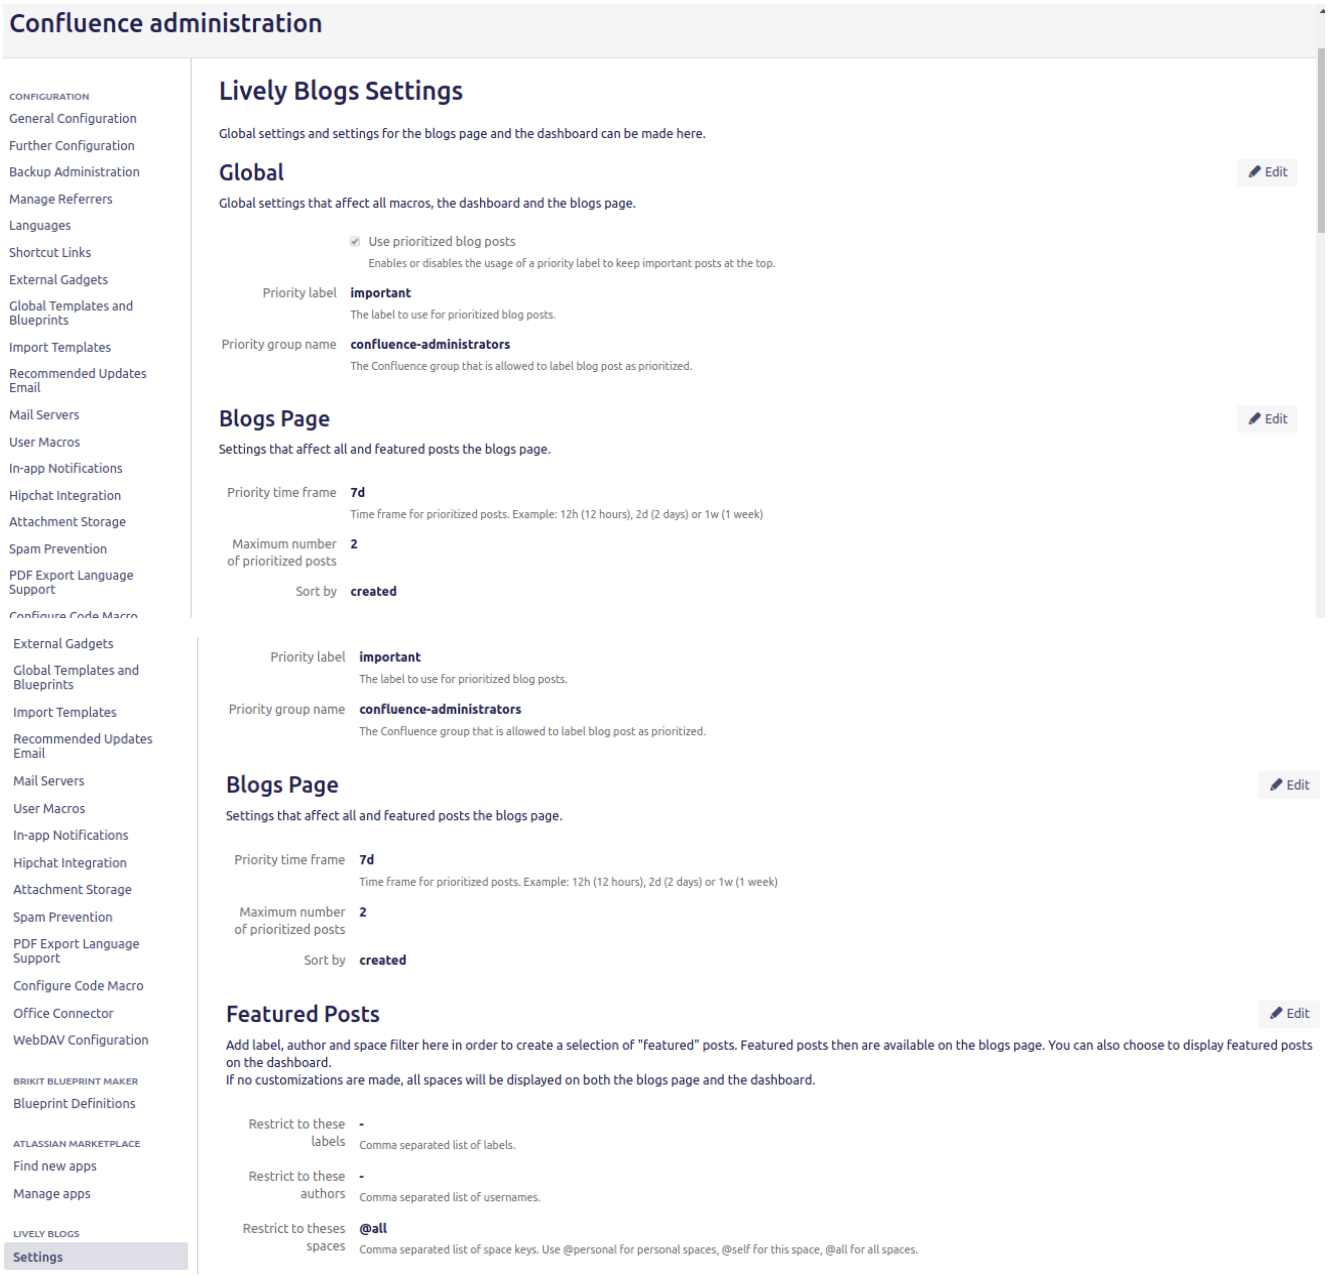
Configurazioni generali

Proseguiamo con le configurazioni. Partiamo sempre dal *Lively Blogs*. La prima cosa che notiamo è la presenza di un nuovo menù, dedicato alla configurazione, come mostrato in figura:

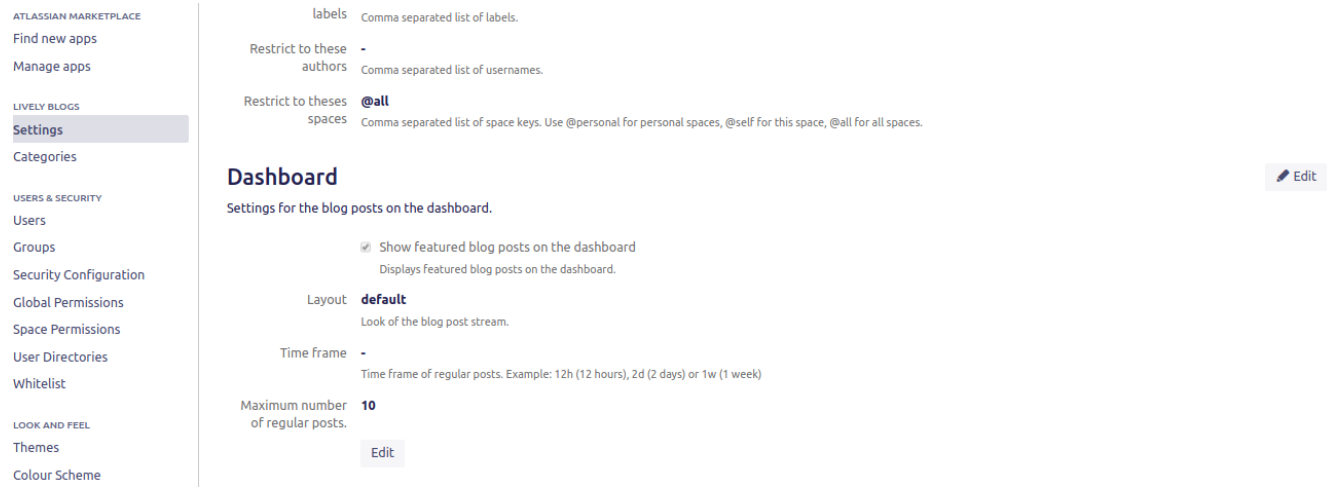


Se selezioniamo Settings, andiamo a visualizzare diverse configurazioni. Andiamo a curiosare.

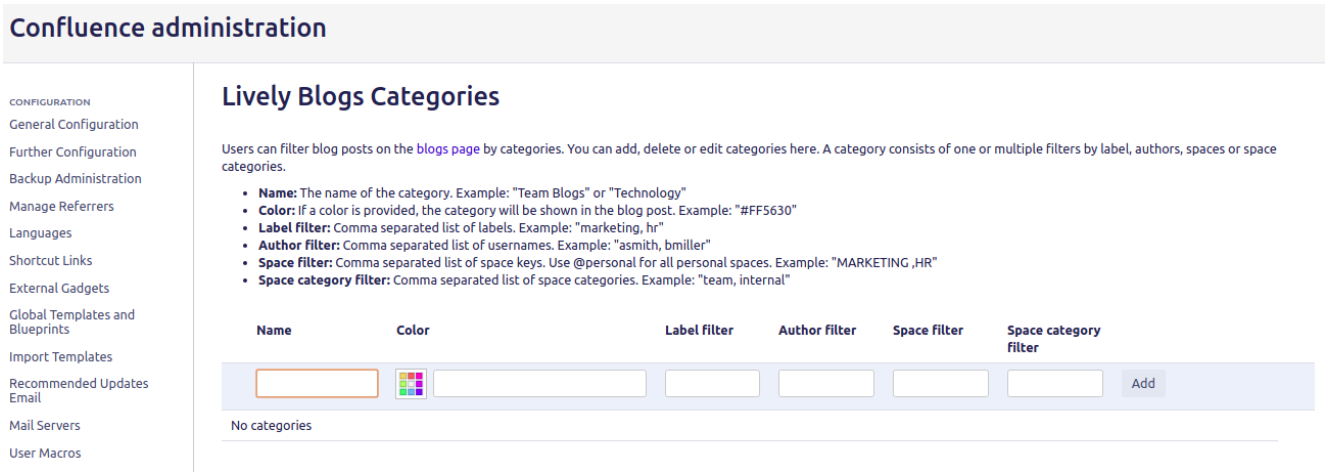
Si tratta di configurazioni generali. La sezione ***Global*** e ***Blogs Page*** indicano la parte in cui andiamo a settare la priorità dei blog post e quanto tempo questi sono evidenziati.



Questo addon aggiunge in Dashboard un gadget che permette di visualizzare i blog post. Di conseguenza abbiamo anche le configurazioni di questa sezione.

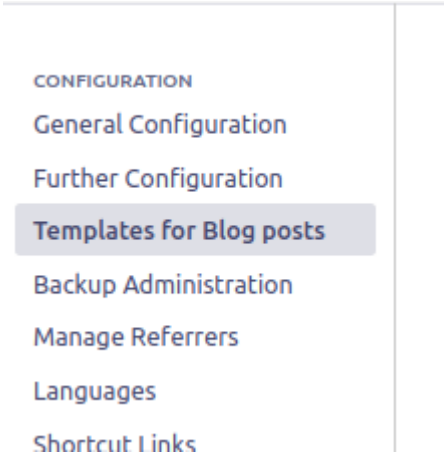


Se invece selezioniamo ***Settings***, queste sono le opzioni che andiamo a visualizzare:



dove sono mostrate le categorie che possiamo assegnare ai Blog post. Qui, anche attraverso un uso dei colori, riusciamo a categorizzare ciò che viene pubblicato.

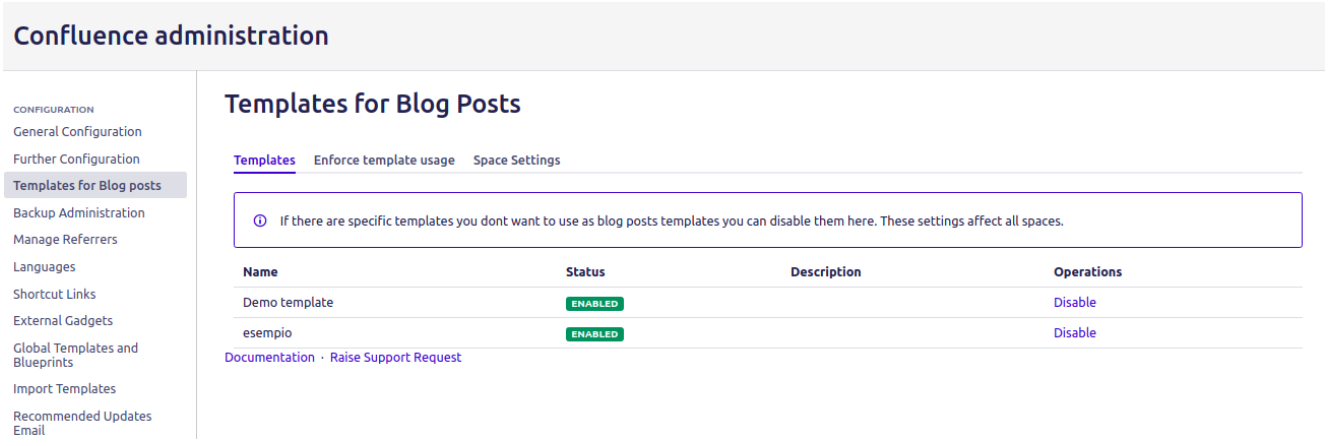
Passiamo alla configurazione generale di *Template per blogs della Bitvoodoo.* La prima cosa che notiamo è la presenza di un singolo menù nella sezione Configuration.

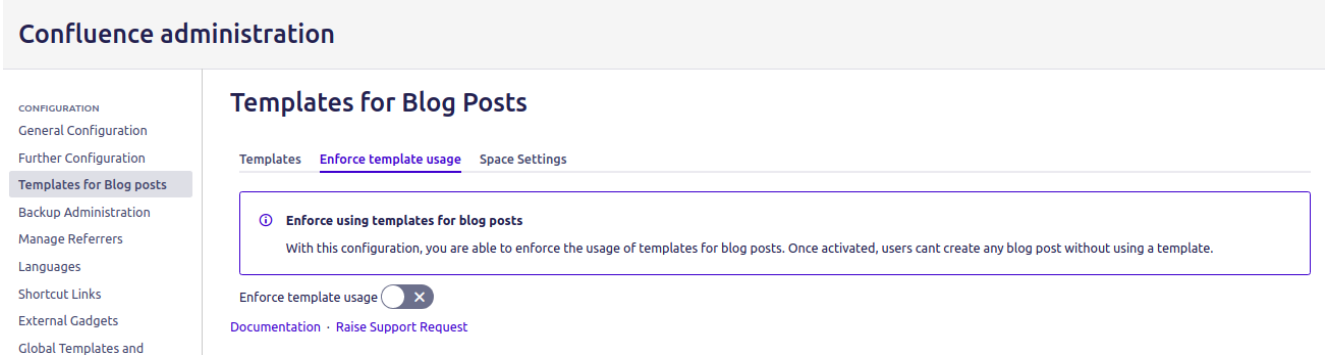


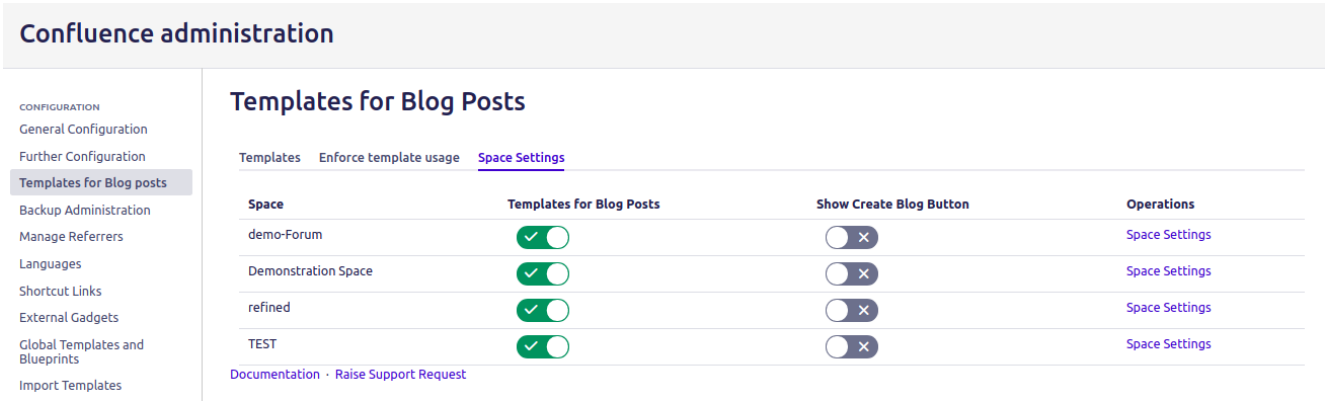
Selezionandolo abbiamo la configurazione generale dell'addon, che mostra tre sezioni:

- Template
- Enforce Template usage
- Space Settings.

Le seguenti immagini mostrano le varie opzioni sulle tre sezioni.







Conclusioni

Il test degli addon sarà riportato nel prossimo post.
